

Slide 1

Unify Logistics Module

Enterprise Logistics Control Tower

Transforming logistics from shipment tracking into operational intelligence.

Slide 2

Current Logistics Capabilities

Existing Modules

- Forward Shipments
- Reverse Shipments
- Delivered Shipments
- NDR Management
- NDR Analytics
- Logistics Intelligence
- Cost Management
- Courier Reconciliation
- COD Reconciliation (to be moved in finance)
- Webhook Monitoring
- Aura AI Logistics Agent

Current Readiness: **85% Enterprise Ready**

Slide 3

Why Unify Logistics is Different

Traditional Platforms:

- Track shipments
- Provide courier updates

Unify:

- Predicts RTO risk
- Rescues NDR shipments
- Detects courier overbilling
- Reconciles COD remittances

- Uses AI-driven logistics intelligence

Slide 4

Market Readiness Assessment

Metric	Score
Market Fit	94/100
Product Maturity	85/100
Competitive Readiness	88/100
Enterprise Readiness	82/100
Ecommerce Readiness	97/100

Slide 6

Enterprise Gaps Identified

To become a true Logistics Control Tower, Unify still requires:

1. SLA Dashboard
 2. Exception Center
 3. Customer Risk Engine
 4. Hub Analytics
 5. Control Tower
-

Slide 7

SLA Dashboard

Purpose

Monitor courier performance against contractual delivery commitments.

Key Metrics

- SLA Met %
- SLA Breached %
- Average Delay
- Courier Performance
- State Performance
- Penalty Recovery

Example

Delhivery

Promised: 3 Days

Actual: 5 Days

SLA Breach Detected

Slide 8

SLA Dashboard Benefits

Logistics Team

- Monitor courier performance

Management

- Identify underperforming couriers

Finance

- Recover SLA penalties

Result

Lower delivery delays and improved customer satisfaction.

Slide 9

Exception Management Center

Purpose

Centralized management of all shipment abnormalities.

Exception Types

- Lost Shipments
 - Damaged Shipments
 - Delayed Shipments
 - Missing Scans
 - Wrong Deliveries
 - Weight Disputes
 - Fraud Alerts
-

Slide 10

Exception Workflow

Issue Detected

Assigned To Agent

Courier Investigation

Resolution

Claim Recovery

Closure

Slide 11

Hub Analytics

Purpose

Identify bottlenecks inside courier networks.

Metrics

- Delivery Rate
- Delay Rate
- NDR Rate
- RTO Rate
- Transit Time

Example

Jaipur Hub

Delay Rate: 17%

NDR Rate: 11%

RTO Rate: 8%

Slide 12

Why Hub Analytics Matters

Without Hub Analytics:

Shipment Delayed

Unknown Cause

With Hub Analytics:

Shipment Delayed

↓

Jaipur Hub Identified

↓

Operational Action Taken

Slide 13

Customer Risk Engine

Purpose

Predict risky customers before shipment dispatch.

Factors

- Previous RTO History
 - Delivery Success Rate
 - COD Percentage
 - Refusal Percentage
 - Address Quality
 - Order Value
-

Slide 14

Customer Risk Example

Customer:

Rahul Sharma

Risk Score: 91/100

High Risk

Recommended Actions

- OTP Verification
 - Manual Call Verification
 - Premium Courier Allocation
-

Slide 15

Customer Risk Engine Benefits

Reduces:

- Fake Orders
- RTO Losses
- Fraud
- Courier Costs

Increases:

- Delivery Success Rate

Slide 16

Logistics Control Tower

Purpose

Real-time command center for the entire logistics operation.

Think:

Airport Control Tower for Ecommerce Logistics

Slide 17

Control Tower Components

Live Metrics

- Orders Today
- In Transit
- Delivered
- NDR
- RTO
- Delayed
- Lost

Courier Health

- Delhivery
- Bluedart
- Xpressbees

Aura Alerts

- Risk Detection
 - Courier Recommendations
 - Hub Issues
-

Slide 18

Control Tower Live Alerts

Examples:

- Delhi NDR Spike Detected

- Jaipur Hub Congestion
- Delhivery SLA Breach
- COD Recovery Delayed

Aura recommends corrective actions instantly.

Slide 19

Competitive Positioning

Feature	Unify	Shiprocket	NimbusPost
NDR Recovery	Strong	Moderate	Moderate
Courier Reconciliation	Strong	Weak	Weak
AI Intelligence	Strong	Weak	Weak
Control Tower	Planned	Weak	Weak
Customer Risk Engine	Planned	None	None

Slide 20

Enterprise Roadmap

Phase 1

- SLA Dashboard
- Exception Center
- Customer Risk Engine

Phase 2

- Hub Analytics

Phase 3

- Logistics Control Tower
-

Slide 21

Final Vision

Unify Logistics is not a shipment tracker.

It is an AI-powered Logistics Intelligence Platform that:

- Reduces RTO

- Rescues NDR
 - Optimizes Courier Allocation
 - Detects Overbilling
 - Improves Delivery Performance
 - Provides Executive-Level Operational Visibility
-

Slide 22

Final Assessment

Current Readiness: **85%**

After Roadmap Completion: **95%+ Enterprise Ready**

Positioning:

"The Operating System for Ecommerce Logistics."
